

ARTIFICIAL INTELLIGENCE (AI)

AI101 Google AI Essentials (0.0 Credits)

This course introduces students to foundational and practical skills for using artificial intelligence in academic, professional, and everyday contexts. Through Google's AI Essentials specialization, students will learn how AI works, how to write strong prompts, how to use AI tools responsibly, and how to integrate AI into real workflows. No prior technical knowledge is required. Students receive a grade of completed or not completed for this course. Acceptable completion requires submission of a Google AI certificate, which students receive after successfully finishing Google AI modules.
