

NURSING (NUA) (ABSN ONLY)

NUA111 Introduction to Professional Nursing (3.0 Credits)

This course presents a basic introduction to professional nursing and is a prerequisite for all other nursing courses. The course presents a broad overview of the non-clinical aspects of the nursing experience such as the philosophy of the nursing program; hallmarks of a profession; nursing theory, history and educational paths; determinants of the scope of nursing practice; health promotion and models of health and illness; theories of stress, coping, grief and loss; professional and therapeutic communication; cultural diversity; and health care law and ethics. 3.75 hours lecture.

Prerequisite(s): Admission into the ABSN program.

Corequisite(s): NUA211, NUA221, and NUA275.

NUA211 Foundations of Professional Nursing (4.0 Credits)

In this course, the students will utilize effective communication principles, nursing process; critical thinking, clients' rights, nursing standards and the value of evidence-based practice provide a foundation for further study. Students learn the varied roles necessary for professional practice. Clinical practice issues integrate asepsis, client safety, documentation, health promotion, disease prevention strategies and health education. Selected clinical skills, introduction to pharmacology, and medical terminology are course components. 3.75 hours lecture, 3.75 hours clinical.

Corequisite(s): NUA211, NUA221, and NUA275.

NUA221 Health Assessment (3.0 Credits)

In this course, the student is introduced to the fundamental knowledge and clinical skills needed to practice as a professional nurse. Health history, introduction to pharmacology, assessment and physical examination are presented and demonstrated. The learner is guided in differentiating between wellness and illness through conducting thorough and systematic physical, psychosocial, and cultural assessments of individuals across the lifespan. Application of the nursing process in beginning clinical practice will be highlighted. Skills relative to the practice of nursing are practiced in the clinical laboratory through simulated experiences and in selected settings. Students will perform health histories, practice basic assessment skills and therapeutic communication techniques, and perform review of systems. 2.5 hours lecture, 3.75 hours clinical.

Corequisite(s): NUA111, NUA211, and NUA275.

NUA271 Evidence-Based Nursing Care of Adult I (6.0 Credits)

This course prepares the learner to use the nursing process to plan, implement, and evaluate effective, collaborative, and culturally appropriate evidence-based plans of care that meet the bio/psycho/social needs of adult patients. The course builds on previous foundations of nursing practice with a focus on integrating pathophysiologic and pharmacologic concepts with the principles of the nursing process, health promotion, risk reduction, clinical decision making, and collaborative management of care for adults experiencing mild to moderate health alterations. Theoretical foundations are reinforced as the nursing process is applied to adult patients within the context of evidence-based patient- and family centered care. The clinical experience focuses on the application of pathophysiologic and pharmacologic knowledge within the context of professional nursing practice in the nursing care of adult patients. As such, the clinical experience is based in settings that allow focus on the application of the clinical reasoning process, nursing diagnoses, patient outcomes, and nursing interventions in the care of patients across the adult lifespan and continuum of care. The clinical sites also support students' developing responsibility for collaboration with other members of the interdisciplinary team. 3.75 hours lecture, 11.25 hours clinical.

Prerequisite(s): NUA111, NUA211, NUA221, and NUA275.

Corequisite(s): NUA285 and NUA325.

NUA275 Pathophysiology (3.0 Credits)

This course introduces the students to basic concepts in pathophysiology as applied in current nursing practice. It builds on previous foundations in the biological sciences and focuses on the integration of pathophysiological with the principles of the nursing process. It introduces students to pathophysiological disturbances to normal body functions emphasizing differences in etiology, epidemiology, pathophysiology, clinical manifestations, and treatments in individuals across the lifespan. The student will analyze objective and subjective manifestations of common health problems resulting from environmental, genetic and stress related conditions. Diagnostic testing, interventions and pharmacological treatments and related nursing implications are discussed as they relate to specific health problems. 3.75 hours lecture.

Corequisite(s): NUA111, NUA211, and NUA221

NUA285 Pharmacotherapeutics (3.0 Credits)

This comprehensive pharmacology course, taken concurrently with the Evidence-Based Nursing Care of the Adult I clinical course, is designed to enhance the knowledge and skills necessary for the student learner to safely and effectively administer and evaluate pharmacological therapies in patients. The course will provide a comprehensive immersion for the drug-specific information that is threaded through each of the clinical courses and will emphasize basic and advanced principles of pharmacotherapy as they relate to patient care across the lifespan. Students will learn to use the nursing process in medication administration. Case studies and clinical simulations will be heavily utilized to promote patient safety as it relates to drug therapy. 3.75 hours lecture.

Prerequisite(s): NUA111, NUA211, NUA221, and NUA275.

Corequisite(s): NUA271 and NUA325.

NUA322 Nursing Care of Childbearing Families (4.0 Credits)

This course prepares the learner to provide family-centered, evidence-based nursing care using concepts associated with the unique responses of families during childbearing, including normal and high-risk pregnancies, as well as the unique responses of neonates and their families to acute and chronic illness. Students will learn to integrate family, cultural and developmental theories into evidence-based nursing practice with childbearing families in a variety of settings. Students will learn to provide effective, collaborative and culturally appropriate family-centered care while they continue to develop in their roles of clinical practitioner, patient educator, and patient advocate as they continue to develop their knowledge related to health promotion, risk reduction, and illness and disease management in contemporary society. The clinical experience focuses on the application of family and developmental theory to the diagnosis, intervention, related pharmacology, and outcomes management in the care of childbearing families. As such, the clinical experience is based in a variety of settings, allowing focus on the application of the clinical reasoning process, including formulation of nursing diagnoses, delivery of nursing interventions, and evaluation of patient outcomes in the care of childbearing families across the continuum of health. The clinical sites also support students' developing responsibility for collaboration with other members of the interdisciplinary team. 2.75 hours lecture, 7.5 hours clinical.

Prerequisite(s): NUA325, NUA271, and NUA285.

Corequisite(s): NUA371.

NUA325 Evidence-Based Behavioral Health (5.0 Credits)

This course prepares the learner to integrate previous knowledge from the biophysical and psychosocial sciences, theories of human development and personality, and theories of human behavior with the art of the purposeful use of self to provide evidence-based nursing care to patients with behavioral health issues and their families in a variety of settings. Students will learn to provide effective, collaborative, and culturally appropriate psychiatric nursing care as they continue to develop in their roles of clinical practitioner, patient educator, and patient advocate, with a specific focus on health promotion, related pharmacology, risk reduction, and the nursing management of psychiatric illness in contemporary society. The clinical experience focuses on the application of communication, developmental, and behavioral theory to the nursing diagnosis, intervention, and outcomes management in the care of psychiatric patients. To support these clinical foci, clinical experience is based in a variety of settings, including community-based self-help groups, providing learning opportunities in the application of clinical reasoning processes in the care of the patient with behavioral health needs across the continuum. The clinical sites also support students' developing responsibility for collaboration with other members of the interdisciplinary team. 3.75 hours lecture, 7.5 hours clinical.

Prerequisite(s): NUA111, NUA211, NUA221, and NUA275.

Corequisite(s): NUA271 and NUA285.

NUA343 Evidence for Professional Nursing Pract (3.0 Credits)

This course presents in-depth exploration of material that was introduced in the NU-A111 Introduction to Professional Nursing and NU-A211 Foundations of Professional Nursing Practice related to knowledge translation into practice; particularly the processes and relationships among research, evidence-based practice, quality assurance, and performance improvement. Using the ACE Star model as a foundation, the course presents the knowledge translation process and offers the learner guided experience in such key knowledge translation activities as formulating PICO questions; performing literature searches; evaluating research studies and systematic reviews; and assessing clinical guidelines for applicability in clinical nursing practice. 3.75 hours lecture.

Prerequisite(s): NUA322 and NUA371.

Corequisite(s): NUA421 and NUA423.

NUA371 Evidence-Based Nursing Care Adult II (8.0 Credits)

This course continues preparation of the learner to use the nursing process to plan, implement, and evaluate effective, collaborative, and culturally appropriate evidence-based plans of care that meet the bio/psycho/social needs for adult patients with multisystem dysfunctions. The course builds on previous foundations of nursing practice of the adult patient and continues the focus of integrating pathophysiologic and pharmacologic concepts with the principles of nursing process, health promotion, risk reduction, clinical decision making and collaborative management of care for adults experiencing acute and chronic multisystem dysfunctions across the continuum of care. Theoretical foundations are reinforced as the nursing process is applied to adult patients within the context of evidence-based patient- and family centered care. The clinical experience allows the learner the opportunity to apply pathophysiologic and pharmacologic principles within the context of professional nursing practice in the nursing care of adult patients with emergent and/or major alterations in health. As such, the clinical experience is based in settings that allow focus on the application of the clinical reasoning process, nursing diagnoses, patient outcomes, and nursing interventions in the care of patients across the adult lifespan with multisystem dysfunctions. The clinical sites also support students' developing responsibility for collaboration with other members of the interdisciplinary team. 3.75 hours lecture, 18.75 hours clinical.

Prerequisite(s): NUA325, NUA271, NUA285.

Corequisite(s): NUA322.

NUA421 Evid-Based Nursing Practice in Community (6.0 Credits)

This course prepares the learner to apply principles of evidence-based care to promote and preserve health and prevent illness in families, groups, and populations in the community setting in the face of changing social, economic, political, and environmental realities. The course will allow students to integrate concepts and theories from epidemiology and public health nursing as well as knowledge gained from previous learning as applied to the health of populations and communities. The learner also will evaluate the influence of cultural diversity, economics, health policy, and ethics as they impact community health nursing practice. Concepts and principles of disaster planning are incorporated so that the student can gain a broad perspective on the nurse's role in supporting emergency preparedness and response. The clinical component focuses on the assessment of the health care needs of the community as client, and on the planning and implementation of strategies to promote and maintain health and wellness for communities and populations in a variety of settings. The learner will conduct an in-depth community assessment employing basic epidemiological principles and data collection strategies and will utilize the nursing process to plan and implement strategies for health promotion and disease prevention. 3.75 hours lecture, 11.25 hours clinical.

Prerequisite(s): NUA322 and NUA371.

Corequisite(s): NUA423 and NUA343.

NUA423 Evid-Based Nursing Care of Childbear Fam (4.0 Credits)

This course prepares the learner to provide family-centered, evidence-based nursing care using concepts associated with the unique responses of families during childrearing, including the unique responses of infants, young and school-aged children, adolescents and their families, to acute and chronic illness. Students will learn to integrate family, cultural and developmental theories into evidence-based nursing practice with childrearing families in a variety of settings. Students will learn to provide effective, collaborative and culturally appropriate family-centered care while they continue to develop in their roles of clinical practitioner, patient educator, and patient advocate while focusing on health promotion, risk reduction, and illness and disease management in contemporary society. The clinical experience focuses on the application of family and developmental theory to the diagnosis, intervention, and outcomes management in the care of childrearing families. As such, the clinical experience is based in a variety of settings, allowing focus on the application of the clinical reasoning process, including formulation of nursing diagnoses, delivery of nursing interventions, related pharmacology, and evaluation of patient outcomes in the care of childrearing families across the continuum of health. The clinical sites also support students' developing responsibility for collaboration with other members of the interdisciplinary team. 2.5 hours lecture, 7.5 hours clinical.

Prerequisite(s): NUA322 and NUA371.

Corequisite(s): NUA421 and NUA343.

NUA471 Evidence-Based Leadership & Management (3.0 Credits)

This course gives students the foundation upon which to build their professional leadership skills. The course focuses on management principles, leadership concepts and theories, executive decision-making processes, and use of financial concepts and principles. Principles related to public policy development and healthcare economics also are explored. Students utilize critical thinking skills to analyze contemporary global, national, and local trends in nursing and health care and begin to develop the skills necessary to thrive in a turbulent healthcare environment. Students are given the opportunity to examine management principles as these relate to roles that are inherent in nursing management and administration positions through a capstone change project paper and presentation. This course gives students the opportunity to explore various leadership roles and styles through both observational and participatory experiences. 2.5 hours lecture, 3.75 hours clinical.

Prerequisite(s): NUA421, NUA423, and NUA343.

Corequisite(s): NUA472 and NUA496.

NUA472 Senior Seminar for Professional Nursing (3.0 Credits)

An advanced course designed to allow for students to apply the learned concepts in the field and provide students with the opportunity to reflect on clinical experiences and help bridge the academia to practice gap. The course focuses on preparing the graduate nurse for professional licensure and practice. The course allows students to explore the concepts of delegation, prioritization, and collaboration with other healthcare disciplines in the delivery of quality healthcare in a variety of commonly occurring patient scenarios throughout the continuum of care. Requirements for RN licensure will be reviewed, including Board of Nursing variations by state, the need for background investigations, licensure exam requirements, and initial and ongoing licensure requirements. A structured NCLEX RN review will be provided to assist students with the licensure examination. Students will prepare for entry into professional practice with an emphasis on preparing for the first nursing position after graduation and on orchestrating a nursing career path. Content on resume preparation, portfolio development, residency programs and the need for lifelong learning will be presented. 3.75 hours lecture.

Prerequisite(s): NUA421, NUA423, and NUA343.

Corequisite(s): NUA471 and NUA496.

NUA496 Transition Into Professionl Nursing Prac (6.0 Credits)

The generic nursing curriculum culminates in this course and provides students with the opportunity to integrate knowledge from all previous courses to deliver evidence-based patient- and family-centered nursing care to patients with complex health care issues across the adult lifespan. To aid in the transition into professional nursing practice, final-semester students will work one on one with a professional nurse preceptor under realistic shift and patient load conditions. Focus will be on the delivery of effective, collaborative, and culturally appropriate patient- and family-centered nursing care to several patients who require complex health care. This intensive course allows students to examine their practice through reflective journaling and class discussion. The course is designed to be taken with NUA471 and NUA472. 2.75 hours lecture, 12 hours clinical.

Prerequisite(s): NUA421, NUA423, and NUA343.

Corequisite(s): NUA471 and NUA472.
