

INTERDISCIPLINARY MINORS

Georgian Court University offers a rich array of interdisciplinary minors designed to address student needs and interests and provide students with knowledge and skills that will prepare them for careers, further study, and lives as productive citizens. In many cases, students may count courses taken for the minor to satisfy other university requirements, such as those in the major field or in General Education. Students are strongly encouraged to consider adding one or more minors to their program of study. Unless otherwise indicated, half or more of the credits required in the minor must be earned at Georgian Court University.
